We live family!

Day by day and with the distinct awareness of our strengths and weaknesses. Our collectively vinified wines benefit from this approach and offer drinkability and authenticity.

The Thiery-Weber family structure is marked by a strong solidarity and every family member can rely on each other.

Erich and Maria Weber have taken over the winery with, at that time, 5 ha from Maria's father Karl Thiery and have developed it into one of the principal wineries of the region. In 2005 Artur, the nephew of Maria and Erich, joined the winery after having collected experiences at home and abroad.

Artur Toifl: the energetic cellar master
Erich Weber: the haven
Maria Weber: the sunshine
Manuela Weber: the vivid
Karl Thiery: the experienced
Eveline Thiery: the kind soul
Michaela Toifl: the soulful

For generations we engage in the skill of vinifying fully ripe grapes into excellent wines. Our family is deeply rooted in our home village Rohrendorf as the vines are in the mighty loess soils of the Saubühel. We cultivate an area of 17 hectares under vine in the heart of the Krems Valley.

diverse nature & complex wines

The soil provides a foundation for healthy vines, vibrant fruit and ultimately great wines. Active soil life is therefore of highest priority. We have relinquished the use of herbicides and instead focus on individual care and implemented permanent green cover in the vineyards. A multitude of bees, butterflies and native insects as well as a rich plant life creates a bustling natural microcosm which finds its final expression in our wines.

Over the last 30 years, dedication, the eagerness to experiment, experience and a sympathetic ear for ideas shaped our vineyard to be one of the leading estates of the Kremstal region.

Product Range

In our assortment we mark out the whole range of different wine styles. We do crisp summer wines as well as age-worthy Veltliner, Riesling and full bodied red reserves.

To portray the natural conditions of the Kremstal in our wines, its loess based soils, steep vineyards and warm climate obliges and motivates us at the same time.

Vineyards

[Kremser Sandgrube](#)

Light and sandy soils prevail and stand for refreshing & spicy Veltliner and juicy & vibrant Zweigelt.

[Gebling](#)

Our home-vineyard is based on conglomerate rock with a thin loess layer – ideal for Riesling and Veltliner which provide delicate fruit and minerality.

[Kremser Weinzierlberg](#)

Mighty loess terraces characterize the mountain. They provide the basis for the smooth mouth feel and typical spiciness of our powerful and concentrated Wines.

[Wolferl-Wine. Ancient tradition.](#)

A tribute to an old tradition. The best grapes of our vineyards unified in a single wine. It reflects the essence of our efforts and shows the specific particularities of the wine year.
